PROJECTS

Tarkine, Sept. 2022 - <https://tarkine.github.io/Main/>

- This project implements fundamental web development techniques such as object-oriented programming, local storage and UI/UX design.
- HTML, CSS, JavaScript, Figma, Git

Personal Portfolio, Current - <https://ethan-luxton.github.io/personal-web-project/>

- This project is ongoing, I am working on developing a personal portfolio with multiple pages. This project is planned to implement React, among other libraries and is additionally a testing ground for CSS animations and various JavaScript events.
- HTML, CSS, JavaScript, React.js, Git

Odd Duck Products, Aug. 2022 - <https://ethan-luxton.github.io/odd-duck-products/>

- This project generates 25 sets of three random images, and allows the user to vote on their favorites. Then the vote and view counts of each product are displayed to the user. The data is saved in local storage.
- HTML, CSS, JavaScript, Chart.js, Git

Salmon Cookies, Aug. 2022 - <https://ethan-luxton.github.io/cookie-stand/>

- Salmon Cookies is a fictional bakery website that features a main informational page, a store page, and a sales page for the website admin. The sales page displays randomly generated sales data for multiple locations and can take into account new sales data.
- HTML, CSS, JavaScript, Git
